

## HELMET WINDBLAST

### Description

The Helmet Windblast is an economical blasting respirator, designed to be lightweight, easy to remove and provides users with a high level of protection. Protective mirror slice design with double layer, the inner layer is PVC lens and the outer layer is a steel glass. The design can improve the helmet lens wear resistance effectively and provide wider field of vision. Breathing air flow evenly spread throughout the helmet to reduce the temperature of the head and face and to prevent the lens from fogging. This helmet is also compliant with national safety technical standards, is durable and the protective effect is good.

#### **PART NUMBER**

0184-001

#### **COLOR**

Blue Color

#### **MATERIAL**

ABS (Helmet Material)

#### **SECURITY**

With national safety standards (cannot be broke)

#### **ENVIROMETAL PROTECTION**

ABS material (non-toxic, harmless)

#### **SEALING**

The bell mouth designed, completely sealed

#### **ITEM WEIGHT / NET WEIGHT**

A molding, no wearing parts

#### **PACKING SIZE**

One box : 37.0 x 25.0 x 23.0 cm = 2.0 kg
